Portfolio, Github, LinkedIn,

Objective

Highly motivated MERN Stack Developer with a strong foundation in JavaScript, React, Node.js, Express.js, and MongoDB. Eager to contribute to innovative web development projects within a collaborative, fast-paced team, leveraging a passion for problem-solving and delivering high-quality, impactful solutions.

Skills

- Frontend: JavaScript (ES6+), React.js, Tailwind CSS, DaisyUI, and dynamic UI libraries (e.g., Lottie React, React CountUp, Typewriter).
- Backend & Database: Node.js, Express.js, RESTful APIs with JWT, and MongoDB.
- DevOps & Practices: Git/GitHub, Firebase Authentication, Cloud Hosting (Firebase, Vercel, Netlify), API Integration, Responsive & Mobile-First Design.

Projects

1. LearnOsphere (Online Course Platform)   Live, Client Code, Server Code
   A comprehensive MERN stack online learning platform for instructors and students.

   - Key Features: Dynamic course catalog with flexible pricing, robust Firebase/JWT authentication, and a unique three-course enrollment limit.
   - Technical Achievements: Mastered JWT for secure API calls and utilized MongoDB aggregation for data integrity.
   - Technologies: React, Node.js, Express.js, MongoDB, Firebase, JWT, Tailwind CSS.

2. Root Rhythm (Plant Care Platform)   Live, Client Code, Server Code

   A MERN stack web application serving as a digital plant care assistant.

   - Key Features: Personalized plant profiles with detailed watering logs and comprehensive health tracking.
   - Technical Achievements: Ensured mobile-first design and implemented complex filtering, sorting, and API query parameters; integrated seamless Google authentication via Firebase.
   - Technologies: React, Node.js, Express.js, MongoDB, Firebase, DaisyUI, Tailwind CSS.

3. Appify (AppStore Application)   Live, Code
   A modern, responsive front-end application for an app store.

   - Key Features: Interactive app listings, simulated "installation" feature, and a robust app rating and review system.
   - Technical Achievements: Secured user authentication using Firebase and gained significant experience with React's authentication context and private routes.
   - Technologies: React, Vite, DaisyUI, Tailwind CSS, Firebase.
